EDUCATION

B.Sc. in Computer Science, Minor in Data Science

Sep. 2020 - May 2025

University of British Columbia (GPA: 3.7/4.0)

Vancouver, BC

- Developer in UBC Subsea Robotics and DSCI clubs. Selected for Google's invite-only Software Product Sprint.

WORK EXPERIENCE

Software Developer

Jun. 2025 – Present

Tata Consultancy Services (Air Canada)

Toronto, ON

- Shipped cloud-native mobile services with React.js, Node.js, and AWS, supporting 100K+ Air Canada users.
- Engineered REST APIs with Lambda, DynamoDB, and S3, reducing latency by 30% and achieving 99.9% uptime.
- Assisted in building an AI-powered virtual chatbot on AWS Connect using Claude LLM and SQS queues, with 90% intent accuracy for 100K+ queries/month.
- Re-architected passenger support workflows with Lambda, DynamoDB, and DAX cache, cutting latency from 5 ms to 500 µs for 50K+ real-time events.
- Drove codebase migration from Serverless Framework to AWS CDK for 10+ services, streamlining IaC deployments using CloudFormation.
- Automated SQL-based defect remediation for DynamoDB data using Node.js + CDK across 20+ services.

Full-Stack Developer

Sep. 2022 – Sep. 2023

Royal Bank of Canada

Toronto, ON

- Improved latency by 25% for 5+ apps by building Java microservices and Spring APIs with Kafka pipelines.
- Reduced config setup time from 10+ mins to under 2 with a Spring Web automation tool across 3 environments.
- Implemented real-time monitoring for 50+ services across 20+ Kafka topics via a metadata tracking solution.
- Secured secrets for 20+ services by migrating YAML configs to HashiCorp Vault, eliminating manual management.
- Led migration of 50+ services across OpenShift and Cloud Foundry platforms, with 0% production downtime.

PROJECTS

MoodMatch AI | React Native, Express.js, MongoDB, Node.js, Python, sklearn

Jul. 2025 – Nov. 2025

- Designed a music recommender app using React Native and Python, recommending 500+ songs for 10+ moods.
- Built a content-filtering ML recommender using Scikit-Learn to suggest songs based on playlists and audio features.
- Integrated JWT authentication, playlist management, and recommendations with MongoDB and RESTful APIs.

ClusterVAN | Python, pandas, Scikit-Learn, Groq LLM, Plotly

Jan. 2025 – May 2025

- Built a business recommender platform for Vancouver by analyzing 300K businesses using unsupervised ML.
- Deployed Groq LLM to provide personal recommendations by analyzing data points over 6 years for 25 locations.
- Set up an interactive Plotly dashboard to visualize 20+ clusters for detailed market analysis, used by 150 users.

TL;DReviews | React.js, Node.js, Lambda, SageMaker, RDS, S3, Docker

Jan. 2025 – May 2025

- Constructed an AWS pipeline analyzing 6,000+ reviews for 450+ students using the PEGASUS text summarization model on SageMaker, and visualizing results with D3.js.
- Ensured security with AWS Macie, VPC, IAM, Security Groups, and KMS, aligning with CISA and NIST standards.
- Streamlined deployment using automated CI/CD with GitHub Actions and packaged with ECR and Docker images.

SKILLS

- Languages:** Java, Python, JavaScript, TypeScript, Go, HTML/CSS, R
- Frameworks/Libraries:** Spring Boot, React.js, React Native, Node.js, Express.js, D3.js, pandas, sklearn, JUnit
- Tools/Technologies:** Apache Kafka, Git, Docker, AWS Services, OpenShift, Cloud Foundry
- Databases:** MySQL, MongoDB, RDS
